## NEXT GENERATION SCHOOL MANAGEMENT SYSTEM

### EXECUTIVE SUMMARY

Once the bell rings every morning in schools, attendance is taken, homework is collected, and before the students are ready to learn, 10 minutes of class time is already out the window. Instructional hours in classrooms have always been at a premium, but never more so than today. Administrative tasks, Testing Requirements, Student Performance Report and Absenteeism all cut into the amount of quality time that teachers get to spend working with their students. A handful of minutes saved every day can result in a rapid return on investment, measured in both actual costs, effective teaching activities, and improved student. Thus, there is a need for school management automation system as it provides all the resources needed for the school to focus on what they do best, teaching. This is exactly where Edunity comes in. Edunity optimizes the premium use of time and resources in schools while automating all the activities of the school, thus enabling smooth, prompt and seamless running of the school.

## THE SOFTWARE

Edunity is a Cloud Based Multi School Management System which focuses on helping schools carry out their day to day activities more efficiently. It is a piece of education technology that schools can use to automate their management process. Edunity is built for school management and administration but also beneficial to the parents, students, teaching and non-teaching staff, and everyone involved in the smooth functioning of a school.

## WHAT IT DOES

Edunity offers multiple services ranging from Student Admission to Student Online Exams, Fees Collection, Exam Results, Mark sheet Generation, Student Performance Report, Student Location Tracking, Activities, Routine Generation, Automatic Payment Reminder, Employee Payroll System and so on. Edunity has a powerful tracking system which facilitates the efficiency and effectiveness of the school bus system while guaranteeing the safety of the students at all times.

## HOW IT DOES IT

Edunity has over 25 modules with various dynamic role-based access level (Admin, Accountant, Teacher, Librarian, Parent, and Student). Its unique features include:

**Dashboard:** Displaying the Employee Statistics, Student Statistics and an Expense Report for the last 12 months or any date range.

**My Account:** which displays Profile Setting, Account Setting, Leave Histories, Salary & Pay slips, Attendances and Routine

**Department & Designation:** Supporting multi-departments with multiple designations and enables addition, editing and deletion.

**Parent & Student Control Panel:** which displays a list of notice and circulars, list of Home Assignments, Marks obtained from the exam, Attendance Report, Grade Card Report, the performance of the student, Upcoming payment info, Upcoming exam schedule, Payment history, Class Subjects, and Study Mate.

- ✓ Reduces manual effort
- ✓ Real-time access to information
- ✓ Improved insights on students' performance
- ✓ Excellent after sale support and maintenance services

## WHAT SETS EDUNITY APART

### Agility

Edunity keeps your school streamlined as it allows you to monitor your IT requirement efficiently and effectively. Edunity is responsive and it utilizes smart processes.

### Scalability

Edunity has the ability to grow as the school grows. It can scale from a single server machine to a system involving clustered components.

### Innovative

Edunity ensures effective communication and apply a targeted approach to your school's technology design. Edunity solutions are targeted at cost-effectiveness and efficient implementation as well as operation.

### Reliability

Edunity is highly reliable. It is capable of dealing with errors, giving room for easy correction of wrongly imputed data.
